

HSBC Global Investment Funds

GLOBAL CORPORATE BOND

Marketing communication | Monthly report 31 May 2025 | Share class BD

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements.

Investment objective

The Fund aims to provide long term capital growth and income by investing in a portfolio of corporate bonds, while promoting environmental, social and governance (ESG) characteristics within the meaning of Article 8 of SFDR. The Fund aims to do this with a higher ESG score than its reference benchmark.

Investment strategy

The Fund is actively managed.

In normal market conditions, the Fund will invest at least 70% of its assets in a combination of investment grade bonds and other similar securities issued by companies in both developed markets and emerging markets, and in asset-backed securities (ABS) and mortgage-backed securities (MBS). With up to a maximum of 20% of its assets in ABS and MBS.

Companies and/or issuers considered for inclusion within the Fund's portfolio will be subject to excluded activities in accordance with HSBC Asset Management's Responsible Investment Policies. Please refer to the prospectus for more details on ESG credentials and excluded activities.

The Fund may invest up to 10% in onshore Chinese bonds; up to 10% in non-investment grade rated bonds; up to 10% in convertible bonds; up to 10% in contingent convertible securities; up to 10% in other funds; and may invest in bank deposits and money market instruments.

The Fund's primary currency exposure is to USD.

See the Prospectus for a full description of the investment objectives and derivative usage.

Main risks

- The value of investments and any income from them can go down as well as up and investors may not get back the amount originally invested
- The Fund invests in bonds whose value generally falls when interest rates rise. This risk is typically greater the longer the maturity of a bond investment and the higher its credit quality. The issuers of certain bonds, could become unwilling or unable to make payments on their bonds and default. Bonds that are in default may become hard to sell or worthless.
- The Fund may invest in Emerging Markets, these markets are less established, and often more volatile, than developed markets and involve higher risks, particularly market, liquidity and currency risks.

The MSCI ESG Key Issue Score is the numerical, weighted average of MSCI’s E, S, and G pillar scores. A higher number indicates a more favourable ESG profile in the view of MSCI.

The weighted averages of the Key Issue Scores are aggregated and companies’ scores are normalized by their industries. After any overrides are factored in, each company’s Final Industry-Adjusted Score corresponds to a rating.

Risk disclosures

- Derivatives may be used by the Fund, and these can behave unexpectedly. The pricing and volatility of many derivatives may diverge from strictly reflecting the pricing or volatility of their underlying reference(s), instrument or asset.
- Investment Leverage occurs when the economic exposure is greater than the amount invested, such as when derivatives are used. A Fund that employs leverage may experience greater gains and/or losses due to the amplification effect from a movement in the price of the reference source.
- Further information on the potential risks can be found in the Key Information Document (KID) and/or the Prospectus or Offering Memorandum.
